PAR 204

1 June 64

SUBJECT: Contact Chip Printer

TASK/PROBLEM

1. Develop and fabricate a contact printer to expose 4 x 5 inch film chip prints with minimum loss of information from selected areas of high-quality roll negatives (up to 200 lines/mm resolution).

2. Each chip will have a two-line title across one end: the first line human readable, and the second to repeat the first in machine-readable characters.

DISCUSSION

3. A revised proposal was submitted late in April based upon the contractor's study of revisions requested by the customer at the 3 and 4 February program review conference.

PLANNED ACTIVITY

4. Awaiting action by the customer on the revised proposal.

GROUP-1
Excluded from automatic downgrading and declassification

SECRET

Declass Review by NGA.
